ATHAR SAYED

PROFESSIONAL SUMMARY

Generative AI Engineer with **2+ years** of software engineering experience, specializing in enterprise LLM applications, Retrieval-Augmented Generation (**RAG**), **Agentic AI, and Azure OpenAI**. Experienced in **building production AI solutions**, automated knowledge-indexing pipelines, and cloud-native workflows, with expertise in **Python, AI/LLMOps, CI/CD automation, and backend infrastructure**.

TECHNICAL SKILLS

- **Programming Languages:** Python (Primary), C++, SQL, JavaScript
- **Generative AI & LLMs:** RAG, Agentic AI, LangChain, LangGraph, PydanticAI, Azure OpenAI, OpenAI API, Hugging Face, Ollama, LLaMA, FAISS, ChromaDB, Embeddings, Prompt Engineering, LLM Evaluation, MCP
- **ML & Data:** PyTorch, TensorFlow, Keras, scikit-learn, XGBoost, Pandas, NumPy, OpenCV, Apache Spark, Apache Kafka
- Backend & APIs: FastAPI, Flask, Streamlit, Node.js, Express.js, REST APIs
- **Databases:** PostgreSQL, MongoDB, MySQL, SQLite
- **Cloud & AI Infrastructure:** Azure AI Search, Azure AI Foundry, Azure Blob Storage, Azure Automation, Azure App Services, Microsoft Entra ID, AWS (EC2, S3, Lambda, IAM), OCI
- **DevOps & MLOps:** Docker, Kubernetes, Jenkins, Nexus Repository, Git/GitLab, GitHub Actions, CI/CD, Prometheus, Grafana, OpenShift, Linux, Bash

PROFESSIONAL EXPERIENCE

Diebold Nixdorf, Mumbai, India

Generative AI Intern — **February 2026 - September 2026**

- Designed and optimized **Docker images** for the AI-Assist Config Agent using **lightweight Red Hat**-based packages and minimized dependencies, while implementing **PyArmor** obfuscation and compiled .pyc files to protect proprietary Python source code and application logic from exposure when distributing containerized applications to clients.
- Architected and migrated **knowledge-indexing workflows to Azure OpenAI**, replacing local embedding infrastructure with the serverless **text-embedding-3-large** model and integrating cloud-based embedding generation into the end-to-end data pipeline.
- Developed flexible **FAISS indexing architecture** supporting incremental updates, multiple agent modes, and dynamic raw-index selection, enabling multiple indexing strategies through a configurable and reusable pipeline.
- Re-engineered the Confluence knowledge-ingestion pipeline to run export, preprocessing, embedding generation, and **FAISS** index creation directly on Jenkins agents, eliminating dedicated compute infrastructure and automating full and incremental builds with Docker validation, timestamped versioning, and **GAV-based publishing to Nexus**.
- Engineered production **Jira Service Desk (JSD) indexing pipelines** supporting open, closed, and combined ticket modes, implementing separate data/KB-summary handling, empty-export resilience, and fixes across production and non-production workflows.
- Rebuilt and stabilized **Azure Automation Runbook and Hybrid Worker infrastructure**, resolving VM execution failures through resource reallocation, dependency configuration, environment synchronization, and end-to-end validation of automated pipeline execution.
- Re-engineered a Streamlit chatbot analytics application into a **React + Express** dashboard, replacing full in-memory loading of **~38K PostgreSQL** records with on-demand API-driven retrieval , implemented server-side pagination, filtering, sorting, and search, plus **LRU/TTL caching**, request coalescing, and PostgreSQL connection pooling.

FortytwoLabs, Pune, India

Software Engineer — **June 2023 - July 2024**

- Managed build & release processes for 6+ production C++ libraries, ensuring stable **cross-platform deployment** (Linux,Windows,macOS).
- Implemented cryptographic modules, including **policy signature** generation and verification, to enhance application security and improve cryptographic processing efficiency.
- Developed and maintained **Makefile**-based build scripts to automate compilation, dependency management, and packaging for Linux environments.
- Implemented application monitoring using **Prometheus** and developed **Grafana** dashboards to visualize application health, resource utilization, and operational metrics.
- Conducted a Proof of Concept (PoC) using **OpenTelemetry** to evaluate distributed tracing capabilities and improve observability across application workflows.
- Monitored application deployments and pod health on **Red Hat OpenShift**, assisting in troubleshooting containerized workloads and ensuring application availability.

FortytwoLabs, Pune, India

Technical Intern — **January 2023 - May 2023**

- Configured **Linux/CentOS servers** and application deployments; managed **SSH** access, Bash scripting, file permissions, and troubleshooting, and configured Apache HTTP Server and Nginx reverse proxies.
- Used **Git**/**GitLab**, **REST APIs**, **Postman**, and **Docker**; configured **MongoDB** authentication, **CRUD** operations, and a 3-node replica set with replication monitoring.
- Developed and tested C++ components using Google Test; implemented RSA, Shamir's Secret Sharing, and SHA-256 using **OpenSSL**, and compiled C++ applications to **WebAssembly** using **Emscripten**.

EDUCATION

Mukesh Patel School of Technology, Management & Engineering, NMIMS — **2024 - 2026**

- M. Tech. – Artificial Intelligence (**CGPA**: 9.08/10)

Symbiosis Institute of Engineering and Technology, Symbiosis International University — **2019 - 2023**

- B.Tech – Electronics & Telecommunication Engineering, Honors in Mechatronics & Automation (**CGPA**: 7.11/10)

CERTIFICATIONS & PUBLICATIONS

- **Certifications**: Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate (**2025**); Oracle Cloud Infrastructure 2025 Certified Generative AI Professional (**2025**).
- **Publications**: "IoT-Based Crowd Detection and Stampede Avoidance Using Predictive Analysis" **— IEEE Xplore (2023)**; "Predictive Analysis of Stress Based on Vital Physiological Metrics" **— Springer Nature (2026).**
- **Achievements: 900+ GitHub contributions** (2025); **solved 150+ LeetCode** problems; received a **Certificate of Appreciation** for serving as **Student Placement Coordinator** at NMIMS (2025–26).
