

ATHAR SAYED

PROFESSIONAL SUMMARY

Generative AI Engineer and M.Tech (Artificial Intelligence) candidate with nearly **2 years** of experience in building enterprise AI solutions, RAG pipelines, LLM-powered applications, and scalable backend systems. Currently contributing to enterprise Generative AI initiatives at **Diebold Nixdorf**, with expertise in Python, Prompt Engineering, AI Agents, LangChain, FastAPI, and cloud-based AI technologies.

TECHNICAL SKILLS

- **Programming Languages:** Python | C++ | JavaScript
- **Generative AI & LLM:** LangChain | Retrieval-Augmented Generation (RAG) | Agentic Workflows | Prompt Engineering | Model Context Protocol (MCP) | LLaMA | Natural Language Processing (NLP) | Vector Databases
- **ML & Data Frameworks:** TensorFlow | PyTorch | Keras | Apache Spark | Apache Kafka
- **Backend & APIs:** FastAPI | Flask | Streamlit | Gradio | Node.js | REST APIs | Client-Server Architecture
- **Cloud Platforms:** Microsoft Azure | Google Cloud Platform (GCP) | Oracle Cloud Infrastructure (OCI)
- **DevOps & MLOps:** Docker | Kubernetes | Jenkins | Git | CI/CD | Prometheus | Grafana | Kubeflow
- **Databases:** MongoDB | SQL | MySQL

EDUCATION

Mukesh Patel School of Technology, Management & Engineering, NMIMS	2024 - 2026
• M. Tech. – Artificial Intelligence (CGPA:9.08/10)	
Symbiosis Institute of Engineering and Technology, Symbiosis International University	2019 - 2023
• B.Tech. – Electronics & Telecommunication Engineering	
• Honors in Mechatronics & Automation (CGPA: 7.11/10)	

PROFESSIONAL EXPERIENCE

Diebold Nixdorf, Mumbai, India	February 2026 - Present
Generative AI Intern	
• Contributed to enterprise-scale Generative AI solutions by enhancing an internal LLM-powered chatbot through prompt engineering, response evaluation, and output optimization to improve response quality and reliability. • Optimized Retrieval-Augmented Generation (RAG) pipelines by refactoring preprocessing modules, modernizing legacy code, and improving context handling to enhance retrieval accuracy, modularity, and maintainability. • Designed and developed scalable Confluence-to-Azure data ingestion and indexing pipelines, enabling automated knowledge synchronization for enterprise RAG applications. • Built incremental indexing frameworks using content hashing and timestamp-based change detection, significantly reducing indexing time and compute overhead for knowledge base updates. • Automated end-to-end knowledge base generation workflows using Jenkins CI/CD pipelines, supporting both full and incremental indexing while improving deployment efficiency. • Containerized AI-powered chatbot services using Docker and implemented Python code protection with PyArmor and compiled bytecode, improving deployment portability and application security.	
FortytwoLabs, Pune, India	June 2023 - July 2024
Software Engineer	
• Managed build & release processes for 6+ production C++ libraries, ensuring stable cross-platform deployment (Linux, Windows, macOS). • Implemented cryptographic modules, including policy signature generation and verification, to enhance application security and improve cryptographic processing efficiency. • Developed and maintained Makefile-based build scripts to automate compilation, dependency management, and packaging for Linux environments. • Implemented application monitoring using Prometheus and developed Grafana dashboards to visualize application health, resource utilization, and operational metrics. • Conducted a Proof of Concept (PoC) using OpenTelemetry to evaluate distributed tracing capabilities and improve observability across application workflows.	
FortytwoLabs, Pune, India	Jan 2023 - May 2023
Technical Intern	
• Gained hands-on exposure to DevOps practices, including CI/CD pipelines, Docker containers, and Linux-based deployment workflows. • Assisted in configuring Nginx and Linux-based reverse proxy setups to optimize application routing & improve deployment reliability • Configured Apache ActiveMQ within Docker containers on CentOS, enabling reliable message brokering & client-server communication.	

PROJECTS

Context-Grounded LLM Assistant for Recruiter-Facing AI Search (Live)	2026
• Built a production-ready LLM assistant for semantic search across portfolio data, enabling accurate retrieval of projects, skills, experience, and publications using natural language queries. • Engineered a context-grounded inference pipeline with dynamic knowledge injection and prompt orchestration to improve factual accuracy and minimize hallucinations.	
IntelliTube – AI-Powered YouTube Insight Engine (Code)	2025
• Built an audio transcription pipeline using Faster Whisper, achieving ~95% transcription accuracy across diverse accents and content types. • Implemented NLP-based sentiment analysis on 100+ scraped comments per video, achieving ~91% classification accuracy with multilingual translation support.	

CERTIFICATIONS

• Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate - Oracle	2025
• Oracle Cloud Infrastructure 2025 Certified Generative AI Professional - Oracle	2025

PUBLICATION

• IOT Based Crowd Detection and Stampede Avoidance using Predictive Analysis - IEEE Xplore · Apr 4, 2023	2023
